multiplicative relationship between two quantities can be expressed as a ratio or a fraction and reduce the given ratio to its simplest form.

- **Divide a quantity**- To be able to divide a given quantity into two parts in a given part or whole ratio
- **Direct proportion** -To be able to solve problems involving direct proportion.

TOPIC : Sequences

LEARNING OBJECTIVE:

- Linear Sequences of Numbers: Substituting values in the nth term to generate sequence and Sequence from patterns of shapes

Using the formula for the nth term

Challenge you child: The answer is '£350 and £450'. What is the question?

Discuss real life examples of Ratio and proportion- including Direct and Inverse proportion

Encourage them to write a recipe to make brownie which requires 4 cups of flour for 6 people, you may want to know how much flour to put for 24 people.

Research on cross curricular links:

Relationships such as the "**golden ratio**" are also extremely important in biology.

Research on Pi (3.14) where the ratio is used to find the Circumference of any circular objects.

Activity:

- **Discuss** the Arithmetic sequences in real life examples
- Write a list of examples / applications of where arithmetic sequences occur in everyday life. Justify why your examples are arithmetic sequences.
- Saving regular amounts. • Depreciation or inflation by regular amounts. • Spending regular amounts. • Heights of buildings where each floor above the ground floor is the same height. • Removing regular equal amounts from a container.

Real life:

- A mobile phone supplier charges €5 plus €0.10 per call. » What is the charge when the user makes 8 calls? » Which term of the sequence is this? » Does

(example: Role of yeast during baking) Students could present their work, by making a Prezi, ppt or a poster on glogster. ➤ Plan an investigation, to find out who amongst the class has a good stamina. ➤ Demonstrate how to set up a yeast experiment using a balloon to collect the gas. Students work in pairs to set up the experiment. ➤ Using photos or videos of other sports such as weightlifting and sprinting, and ask the students to suggest how these sports differ from the sports in the real-life video. Students should discuss whether or not these sportspeople gain energy in the same way. 	<ul style="list-style-type: none"> • https://www.bbc.co.uk/bitesize/guide/s/zpwmxnb/revision/1 • https://www.youtube.com/watch?v=3pD68uxRLkM • https://www.youtube.com/watch?v=J0KxRX3fyoI • http://www.docbrown.info/ebiology/photosynthesis.htm • https://www.youtube.com/watch?v=C Bv2BqqAydE • https://www.youtube.com/watch?v=s bG6rpfy07Y • https://www.youtube.com/watch?v=4 GB2BLQGX0s • https://www.youtube.com/watch?v=8_x7Fy06ibg • https://www.youtube.com/watch?v=R DUqDWIFJdw • https://www.youtube.com/watch?v=8 Y_Fdjl2v4I
