Title: World Space Week

Presenters / Conductors: Foundation Stage teachers

Aims & Objective: To explore how things, look from different viewpoints including objects that are near or far away. To use everyday materials to explore, understand and represent their world-their ideas, interests and fascinations.

Summary: FS students explored space through different activities. They enjoyed singing and dancing on the songs followed by a story 'How to catch a star'. Our little explorers were engrossed in different activities such as building rockets with blocks, creating sun, moon, planets and stars using playdough and even stretched their imagination by doing spaceship inspired art and craft. Overall, it was a wonderful week as students discussed about the wonders of space by talking about astronauts and things we need to go to space.

Pictures / Flyers Etc:

Student/Parent/Teacher Feedback: Ms. Priti Sandwar, Form tutor of FS1F said "Children were all excited and loved to create space things using their own imagination and learnt new vocabulary like astronaut, rocket, alien, planets and many more."

Organized by: Foundation Stage teachers and learning partners.
